NETWORKS
AN INTERNATIONAL JOURNAL

Subject Index to Volume 34, 1999

Acyclic orientation coverings, 47
Aircraft landing, scheduling, 229
Aircraft landing problem, 229
Algorithms
  branch-and-bound, 229
  branch-and-cut, 291
  finding K shortest simple paths, 88
  Gomory–Hu, 132
  graphs, 1
  greedy, 1, 136
  KSP, 88
  layered wheel floorplan designs, 67
  on-line versus off-line, 73
  simplex, 229
  tabu search, 162
Arc routing, 291
Asynchronous pacer protocol, 11
Average-set-eccentricity, 312

Balance vertices, trees, 264
Bipartite digraphs, superconnectivity, 197
Bipartitions, balanced, 264
Branch-and-bound algorithm, aircraft landing, 229
Branch-and-cut algorithm, Eulerian location problems, 291

Cactus graphs, 37
Cartesian products, graphs, 47
Center
  subgraphs, 303
  tree, 272
Centrality measures, 244
Centroid
  subgraphs, 303
  tree, 272
Centroid criterion, 244
Chordal rings, interval routing, 47
Chromatic index, 61
Competitive analysis, retransmission timeout, 73
Compound graphs, 61
Constructive base heuristic, 229
Crossings, 173
  multiterminal cuts, 215
Cross postman problem, 173
Cuts, multiterminal, 215

Diameter, 312
  conditional, graphs and digraphs, 197
Digraphs
  conditional diameter, 197
  superconnectivity, 197
Diversification, 162
Domatic partition problem, 1
Dynamic 1-median problem, 250
Dynamic networks
  locations on, 250
  path selection problem, 250

Eccentricity, 115
  generalized, 312
Edge coloring, large graphs, 61
Edge-deleted distance stable graphs, 279
Edge-superconnectivity, 197
Edge weights, vector-valued, 19
Eulerian location problems, 291

Fault diagnosis, adaptive, 206
Feasibility problems, vector-valued edge weights, 19
Floorplan, layered wheel, 67

Girth, 197
Gomory–Hu algorithm, 132
Graph products, tenacity, 192
Graphs
  algorithms, 1
  cactus, 37
  Cartesian products, 47
  conditional diameter, 197
  directed, 81, 197
  eccentric, 115
  edge-deleted distance stable, 279
  finding K shortest simple paths, 88
  generalized eccentricity, radius, and diameter, 312
  interval, 1, 81
  large, given degree and diameter six, 154
  lithium, 37
  noncrossing cuts, 215
  optimal edge coloring, 61
  Steiner tree problem, 162
  superconnectivity, 197
  tree t-spanner, 81
  well-covered, 221
Greedy algorithm, 1
  online, 136
Grids, tenacity, 192

Hamiltonian circuit, 1
Hamiltonian path, 1

Interconnection networks, edge coloring, 61
Interval routing
  deadlock-free, 47
  linear, 37

Joinsemilattice of subtrees, 272

k-coteries, modeling, 221
k-interval labeling schemes, 47
k-mutual exclusion, 221
KSP algorithm, 88

Least *L*-eccentricity, points, 272
Linear interval routing, lower bounds, 37
Lithium graphs, 37
Location routing, 291
Location theory, 283
LP relaxation, 102

Machine job scheduling, 229
Maximum matching problems, 1
Median
  criterion, 244
  subgraphs, 303
Memory, overhead, distributed snapshots, 11
Min-average cost path, 19
Minimum imbalance cost path, 19
Min-set-eccentricity, 312
Morre bipartite diameter 6 graph, 154
Multicut problems, 102
Multiple runway problem, 229
Multiprocessors, adaptive fault diagnosis, 206
Multiway problems, 102

Network location problems, unified approach, 283

Obnoxious route selection, 250
Optimal path cover problem, 1
Optimum requirement spanning tree, 122, 132
Ordered median problem, 283
Orientation optimization problem, layered wheel floorplan, 67

Packet radio networks, 61
Periphery, 115
Pilot method, 181
Problem space search heuristic, 229

Radius, 312
Randomized rounding, 102
Reliability, tree networks, 122
Retransmission timeout, 73

Rings
  adaptive diagnosis, 206
  chordal, 47
Routing problems, vector-valued edge weights, 19
Rural postman problem, 291
  undirected network, 173

Simplex algorithm, 229
Single-facility location problem, 283
Snapshots, distributed, 11
Spanning tree, 81
  optimum requirement, 122, 132
Steiner center for graphs, 258
Steiner distance, 258
Steiner eccentricity of vertices, 258
Steiner median of graphs, 258
Steiner problem in graphs, 181
Steiner tree
  heuristics, 181
  tabu search heuristic, 162
Subgraphs
  center, median, and centroid, 303
  central, sequences, 244
  eccentric, 115
Subtrees, least central, 272
Superconnectivity, graphs and digraphs, 197

Tabu search algorithm, 162
Tenacity, graph products and grids, 192
Time-varying networks, locations on, 250
Tori, adaptive diagnosis, 206
Traveling salesman problem, 181
Tree
  adaptive diagnosis, 206
  balance vertices, 264
  central subgraph sequences, 244
  reliability, 122
  subtree center, 272
Tree *t*-spanner, 81

Vertex, 192
  edge-deleted distance stable, 279
Virtual circuits, routing, 136
